AIRIS

THE SCIENCE OF PURE AIR

AIRIS is the new product line developed by **CSV Life Science Group**, combining highly selected technologies with carefully selected technologies.

Designed for critical environments such as **pharmaceutical cleanrooms and GMP manufacturing areas**, the AIRIS range includes Down Cross, Unidirectional Air Flow Units, Air Showers, Mist Showers, Pass Boxes, Stainless Steel Accessories and more.

Each product in the AIRIS line is validated to meet the **high-quality expectations** of regulated industries – all under one recognizable and internationally viable brand.

AIRIS-DC DOWNCROSS

- Vertical Unidirectional Laminar Flow hoods for operations in controlled environments.
- Ideal for sampling, weighing, and pre-processing in cleanrooms.
- Unidirectional Air Flow that protects both operator and product.
- Exhaust filter unit on front side or in the false ceiling.
- Compact, built in compliance with international GMP standards.

AIRIS-UDAF UDAF (LAF) SYSTEM

- Unidirectional Laminar Air Flow module for environments with particle control.
- Delivers ultra-clean air over critical processes.
- Modular system, configurable according to client specifications.

AIRIS-AS AIR SHOWER

- High-efficiency air showers for particle removal from personnel and goods.
- Rapid, automatic system to support barrier integrity between zones.
- A critical checkpoint for cleanroom GMP compliance.
- Available in various layouts to fit facility architecture.

AIRIS-MS MIST SHOWER

- Fine mist showers for surface decontamination prior to cleanroom entry.
- Advanced vapor technology reduces microbiological contamination risk.
- A strategic step for high-grade sterile access protocols.
- Seamlessly integrates into GMP-compliant decontamination flows.

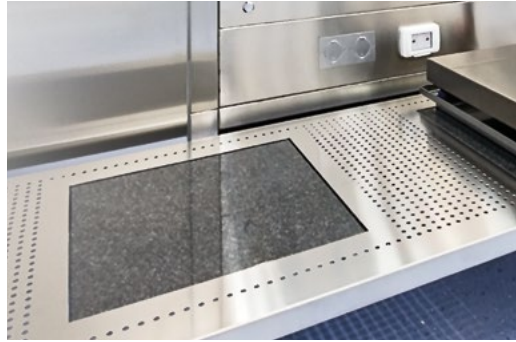

AIRIS-PB PASS BOX

- Filtered pass-through systems for contamination-free material transfer.
- Eliminates cross-contamination between areas with different classification.
- Optional VHP or HPE sanitization.
- Robust and ergonomic design, perfectly cleanroom-integrated.

AIRIS-XC ACCESSORIES

- Tables and Trolleys in Stainless Steel with marbles or plastic inserts.
- Weighing Stations.
- Dispensing Stations.
- Rolling conveyors.

CSV life Science Group is a group of companies providing the pharmaceutical market with integrated solutions. Its final purpose is to successfully complete a project in all its phases: from strategic decisions to engineering activities definition, from process development and containment strategy up to the final validation. The family has grown over the years and today consists of: CSV Life Science, CSV Construction, Pharma Hub, CSV Active, CSV Containment, CSV Pharma Service, CSV Hellas and CSV Life Science Ibérica.
